Richmond Chamber of Commerce The Long View on Metropolitan Atlanta a Socioeconomic Primer

The Atlanta Regional Commission

Vision ONEGICALREGION

Mission

Foster thriving communities for all within the Atlanta region through collaborative, data-informed planning and investments.

Values

Goals

Healthy, safe, livable communities in the Atlanta Metro area.

Strategic investments in people, infrastructure, mobility, and preserving natural resources.

Regional services delivered with operational excellence and efficiency.

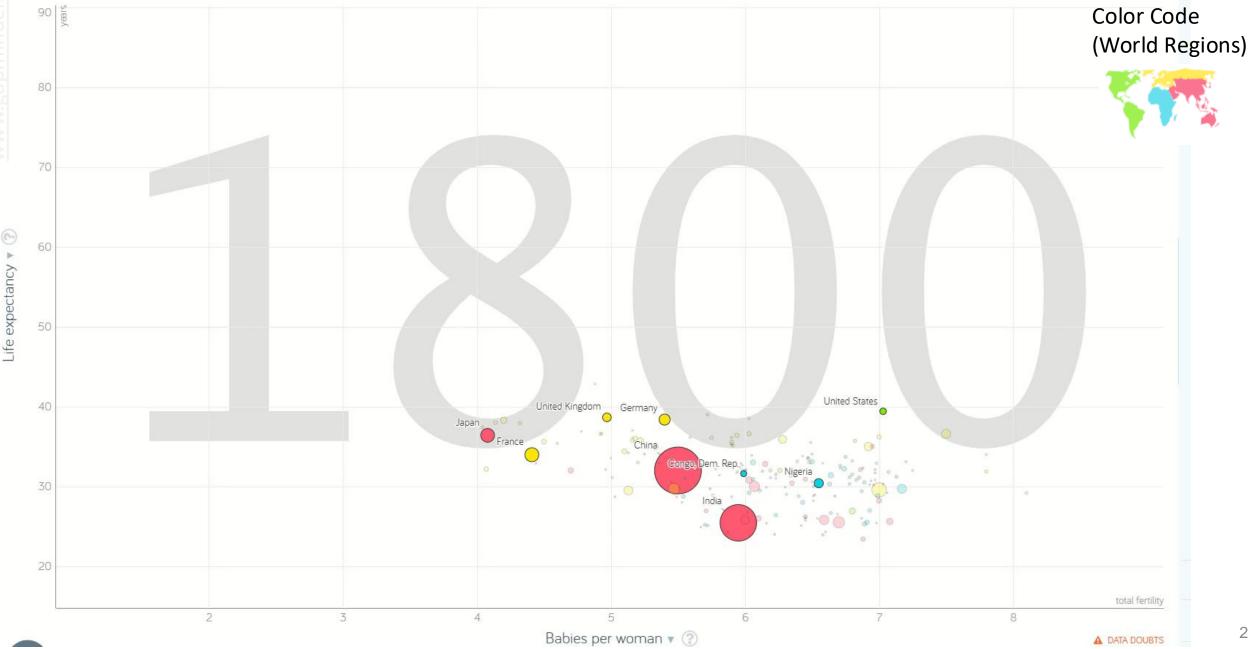

Diverse stakeholders engage and take a regional approach to solve local issues.

A competitive economy that is inclusive,

Excellence | I Michael D. Alexander, "Mike" Chief Operating Officerive Atlanta Regional Commission malexander@atlantaregional.org

Atlanta metro area now 6th largest in U.S., Census Bureau estimates

Atlanta's 29-county region surpasses Washington, D.C., and Philadelphia in terms of population, according to latest data

Credit: Jason Getz / Jason.Getz@ajc.com

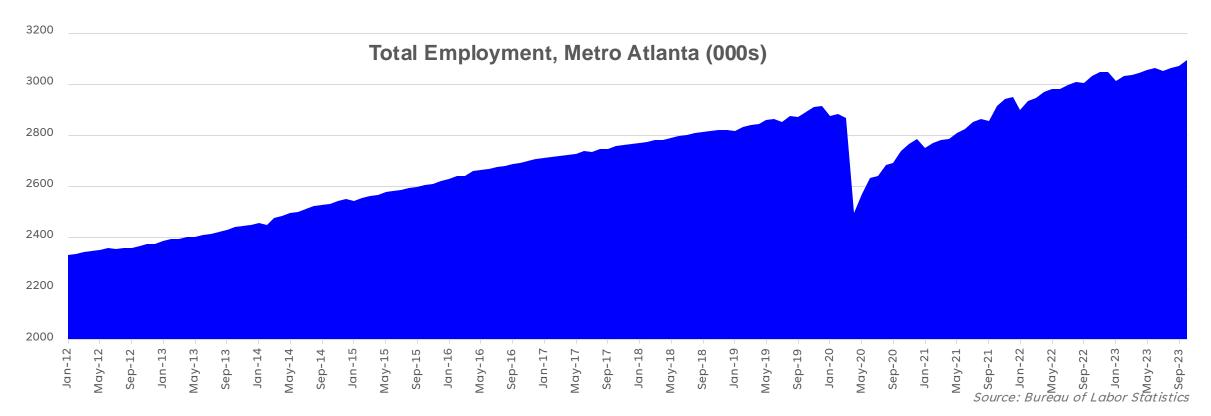

061722 Atlanta: Automobiles travel along the I-75 / I-85 connector shown from the 17th street bridge Thursday, June 16, 2022, in Atlanta. The 29-county Atlanta metropolitan statistical area is now the sixth largest in the country, according to U.S. Census data released in March 2024 (Jason Getz / Jason.Getz@ajc.com)

Europeans Are Becoming Poorer. 'Yes, We're All Worse Off.'

Europe's current predicament has been long in the making. An aging population with a preference for free time and job security over earnings ushered in years of lackluster economic and productivity growth. Then came the one-two punch of the Covid-19 pandemic and Russia's protracted war in Ukraine.

DRAFT ARC Regional (21-County) Population and Employment Source: DRAFT ARC Forecasts

Employment

—Population

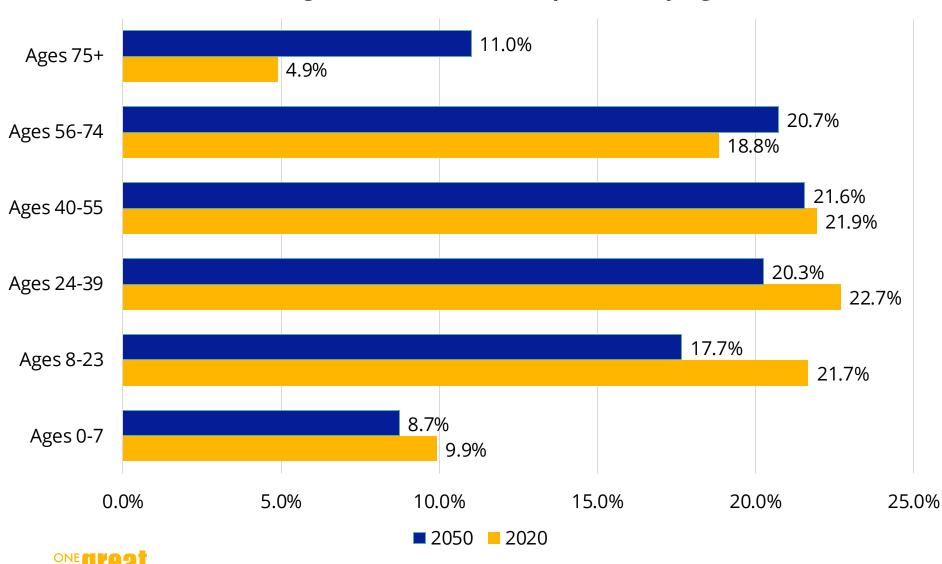

ONE **CITERION**

The draft forecast adds approximately 1.8 million new residents and 860,000 new jobs by 2050.

Age Forecasts

Existing and Forecast % of Population by Age

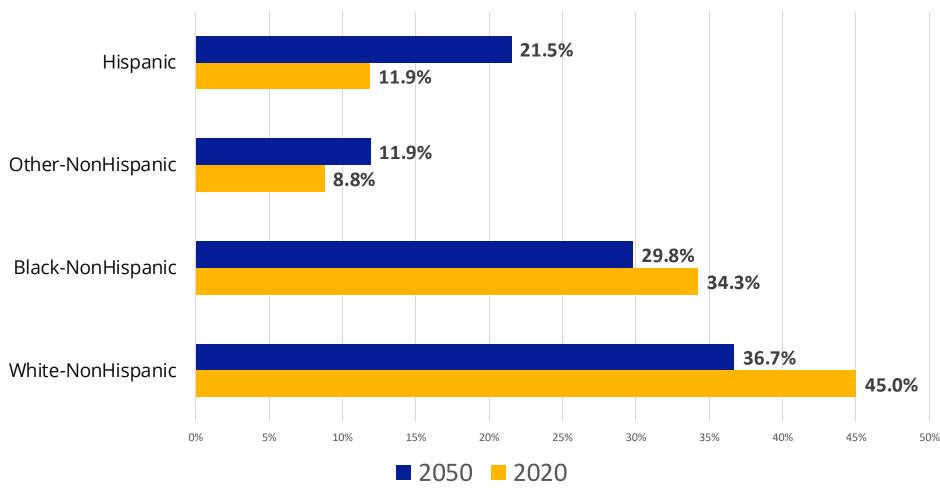

Only the 75+ and the 56 - 74 age cohorts will grow in share of population by 2050. The declining fertility rates are a significant driver of this trend. Almost 900,000 people aged 75 and older are forecast to live in the region by 2050.

Race/Ethnicity Forecasts

Share of Total Population By Race and Ethnicity

As with the previous 30 years, or so, almost all of the growth the region will get over the next 30 years will come from populations of color.

ARC's Series 17 Forecasts: Maps!

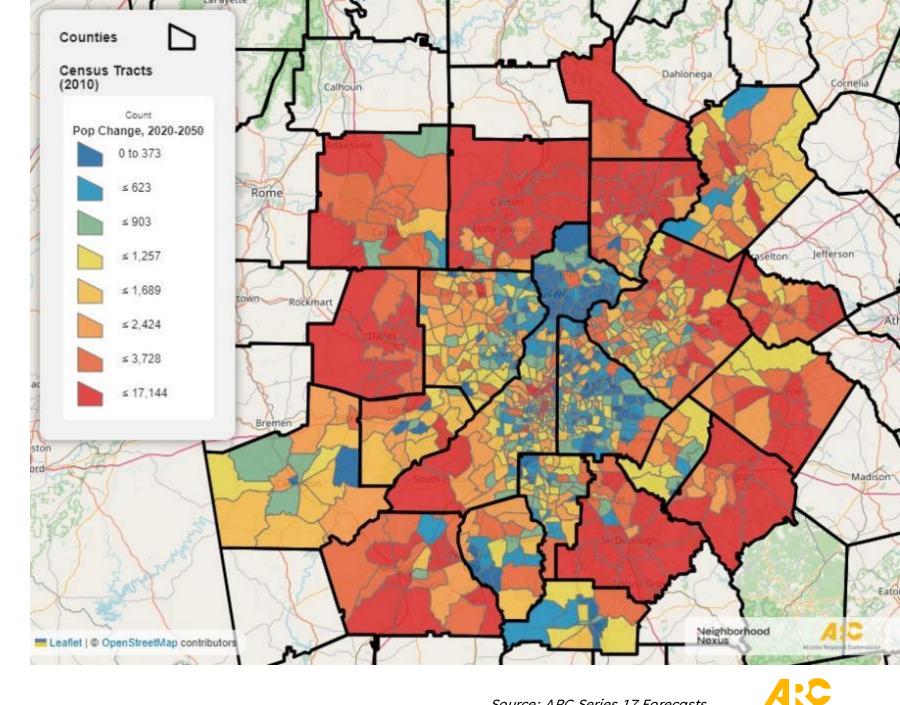

Total Population Change, 2020 - 2050

This map looks at total population change at the census tract level.

As can be seen, the outlying areas have the highest levels of total growth, but these areas also have the largest census tracts, so it is to be expected to see large numerical gains in these areas. There are, however, several tracts in the urban core that are "red", meaning that these areas, too, are expected to gain significant population growth in the future.

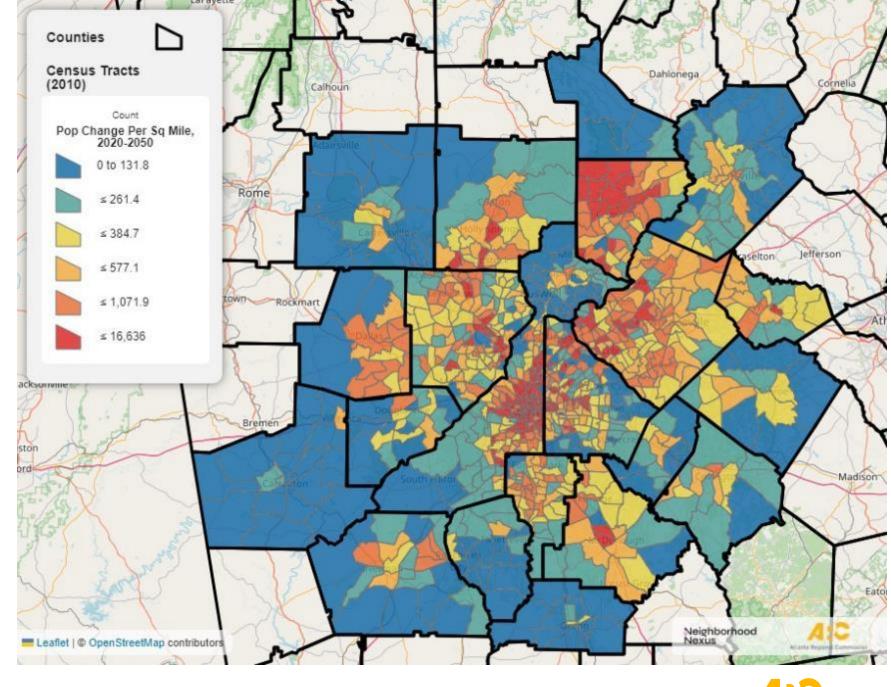

Population Change Per Sq. Mile, 2020 -2050

This map looks at population change per square mile at the census tract level. Therefore this is looking at which areas will densify the most.

As can be seen, this maps serves as a stark contrast to the previous map as this normalizes for the size of the tract. Here we see that the urban core – in the city of Atlanta, areas surrounding Decatur in DeKalb, areas near the Vinings area in Cobb all will see significant densification in the upcoming years. This includes more suburban areas like Gwinnett, Forsyth and Cherokee (particularly near Woodstock) as well.

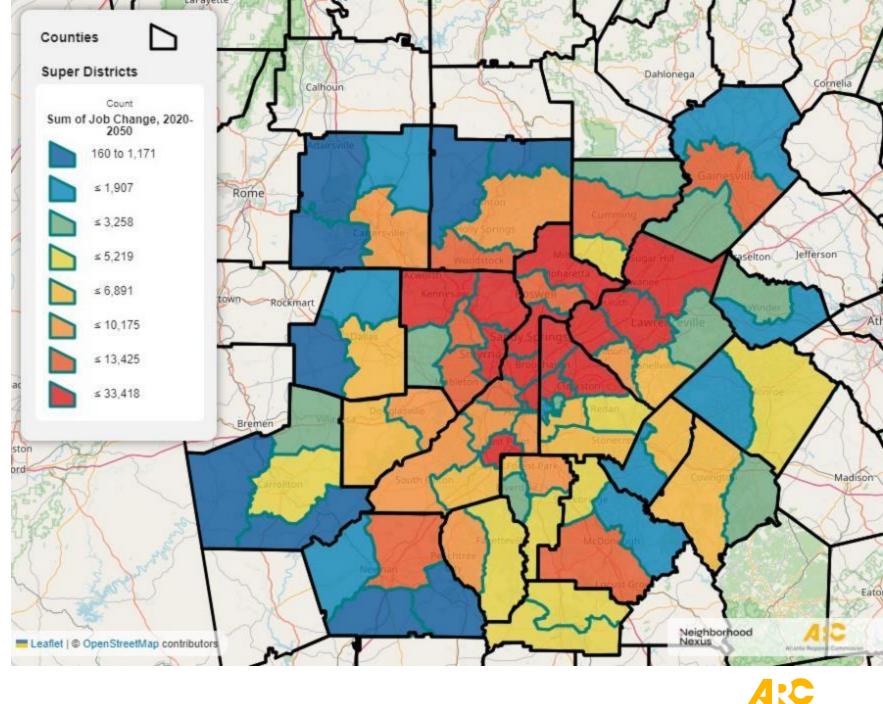

Finally, we see that many of those outlying areas there were "red" in the previous map are now blue

Total Job Change, 2020 - 2050

This map looks at job change at the ARC's Superdistrict level. Superdistricts were created by ARC to be a consistent small area geography over time. They are made up of aggregations of census tracts.

As can be seen, most of the forecast job growth will go to the northern parts of the region, continuing a historical trend. There are areas south, particularly around the Airport and in Henry County where job growth will be robust as well.

Share of Higher Paying Jobs

Five Strongest Correlates of Upward Mobility

1. Segregation

Greater racial and income segregation associated with lower levels of mobility

2. Income Inequality

Places with smaller middle classes have much less mobility

3. School Quality

Higher expenditure, smaller classes, higher test scores correlated with more mobility

4. Family Structure

Areas with more single parents have much lower mobility

Strong correlation even for kids whose own parents are married

5. Social Capital

"It takes a village to raise a child"

Putnam (1995): "Bowling Alone" "Our Kids.."

https://opportunityinsights.org/cours

In Atlanta, that approach doesn't work because opportunity neighborhoods tend to be very expensive. So the next step is to hone in on exactly when the disparities between kids emerge and target place-based interventions to that age-group tailored to each neighborhood. Prenatal care, kindergarten preparedness, college counseling—all become "particular treatments for each patient on the basis of precise diagnosis," Chetty says.

Literacy and Justice for All Collaborative Grant to Significantly Impact Literacy Efforts in City of Marietta

Caramanity-wide commitment to empower every child in Marietta to be proficient readers by third grade-

Marietta, GA - <u>Marietta City Schools (MCS)</u> and the city of Marietta will be the focus of a collaborative grant working to create a language-centered ecosystem and learning environment for children from birth to grade three. The goal of the new initiative "Literacy and Justice for All" is to use a community-wide commitment to the science of reading to empower every child in Marietta to be a proficient reader by the end of third grade.

The expectation is for Marietta to be a model that will yield change throughout Atlanta, across Georgia and the southeast region, and ultimately, on a national level. This work is critically important as schools address both the significant learning loss resulting from the pandemic and the gaps in opportunity that often occur around literacy in our communities. According to United Way of Greater Atlanta, children who are not reading by the third grade are four times more likely to drop out of high school, which may limit their opportunities in school, in work, and in life.

"It is an honor to lead the design and implementation of what we hope will become a national model for literacy," said Superintendent Dr. Grant Rivera. "Our school community and our city have an unwavering commitment to our children, and we believe MCS can accomplish that which has been elusive for many other school districts regionally and nationally: third grade reading proficiency."

The first step in "Literacy and Justice for All" is an extensive literacy training by nationally known expert, Dr. Margie Gillis of Literacy How. Gillis will lead key MCS staff through a series of facilitated discussions and exercises that will establish the foundation for the initiative. The training will occur May 6-7, 2021 in Marietta, Ga.

Planning for the grant began in fall 2020 in conjunction with Rollins Center for Language and Literacy at the Atlanta Speech School. The \$2.5 million dollar award was confirmed April 26, 2021 and is allocated by United Way with support from the Joseph B. Whitehead Foundation. MCS—along with United Way, Rollins Center, Learn4Life, Cobb Collaborative, Quality Care for Children, and Kennesaw State University—will support parents, teachers, and other child-facing adults with the knowledge, skills, and agency to implement healthy brain development.

Marietta-based investments from United Way in year one includes teaching resources, trauma-informed training, professional development, social-emotional learning, community programming, early learning opportunities, personnel, and evaluation.
